

Digital Ceramic Hair Straightener

This professional hair straightener features digital temperature control and ceramic plates for even heat distribution. It is ideal for creating smooth, straight styles or adding curls and waves.

Product Overview

Professional Performance

This digital ceramic hair straightener is designed for professional-grade styling, offering precise temperature control ranging from 150°C to 230°C. Featuring advanced ceramic-coated floating plates, it ensures even heat distribution to protect hair while delivering smooth, sleek results. With safety features like a 30-minute auto shut-off and a convenient 360-degree swivel cord, this tool combines efficiency with ease of use for any salon or home environment.
