

Digital Display Air Fryer

This air fryer cooks food by circulating hot air, creating a crispy outer layer. Its digital display allows users to precisely control temperature and cooking time.

Product Overview

Professional Digital Air Fryer

This compact countertop air fryer utilizes high-speed hot air circulation to cook food with a crispy, browned exterior. By leveraging the Maillard effect, it achieves deep-fried textures using minimal oil. The integrated digital display provides precise control over temperature and cooking time, ensuring consistent results for a variety of culinary applications.

Performance & Control

Key Performance Metrics

200 °C
Max Temperature

Control Interface	Digital Display
Cooking Technology	High-speed hot air circulation, Maillard effect browning

Design & Usage

Key Features

- Digital temperature control
- Timer settings
- Compact countertop design
- Crispy texture technology

Appliance Type	Countertop Air Fryer
