

Digital Display DC/MMA Inverter Welder

This compact and portable inverter DC/MMA welder is designed for diverse welding tasks. It features a digital display for precise current control and robust construction for enhanced durability.

Product Overview

Professional DC/MMA Inverter Welder

This compact and portable inverter DC/MMA welder is engineered for versatile welding applications, making it suitable for both professional and DIY projects. It features advanced IGBT inverter technology with a hot start function for improved arc starting and a digital display for precise current control. With a dual-voltage input capability and robust construction, this welder provides reliable performance and flexibility for various worksites.

Technical Specifications

Performance Summary

200 A

Max Output Current

70 V

No-Load Voltage

Output Current Range	200 A
Input Voltage	110-120V 50/60Hz, 220-240V 50/60Hz
No-Load Voltage	70 V
Input Current	41 A

Key Features

Core Technology

IGBT Inverter • Hot Start • Digital Display

Included Accessories

Included Equipment

- 1.2m Earth Clamp
- 1.8m Welding Holder
