

Digital Display Electrical Control Panel

This electrical control panel features a digital display for monitoring electrical parameters. It is equipped with LED indicators and multiple buttons for precise control.

Overview

Professional Electrical Control Panel

This digital display electrical control panel is designed for precise management and monitoring of industrial electrical systems. Featuring a clear digital interface and integrated LED indicators, it provides real-time data feedback for critical operations. Its robust design ensures reliable performance in demanding electrical environments.

Technical Specifications

Supported Operating Voltages

- 3X100V
- 3X380V
- 3X220/380V
- 3X230V

Display Interface

Digital Numerical Display • LED Indicators

Model Identifier

DOW-1141

Manufacturing Year

2006
