Product Overview

Professional Performance Hair Styling

This advanced hair straightening brush is engineered for optimal appearance and superior styling performance. Featuring an upgraded wider comb design and rapid heating technology, it is specifically suited for managing thick hair with ease. The integrated LED digital display provides real-time temperature monitoring for precise control during use.

Technical Specifications

Temperature Range

120 °C

Minimum Temperature

200 °C

Maximum Temperature

Brush Width

4.1 cm

Construction & Materials

Key Design Features

- LED Real-time temperature display
- Dorsal heat insulation system
- Deep-penetrating comb teeth for thick hair
- Rapid warm-up technology

Materials Used

SupperNylon, Die-cast Aluminum, Iron Plate

Performance Comparison

Comparison Against Previous Generation

Feature	Improvement
Brush Width	+1.1cm wider
Dorsal Temperature	20°C lower than A6111
