

# Digital Display IGBT Inverter Welding Machine

This IGBT inverter welding machine uses advanced technology for a strong, compact design and high duty cycle. It is suitable for MMA welding of low carbon steel and low alloy steel with various welding rods.

## Product Overview

### Professional Inverter Welding Solution

This digital display IGBT inverter welding machine is engineered for precision, reliability, and ease of use in professional welding applications. Utilizing advanced inverter technology, it provides a stable arc and excellent welding performance across various tasks. The integrated digital screen allows for accurate monitoring and control, making it a versatile tool for efficient welding operations.

## Technical Specifications

Mains Voltage	220 V
Frequency	50 HZ
No-load Voltage	60 V

## Performance Metrics

### Rated Input Capacity

**7.1 KVA**

Rated Input Capacity

### Output Current Range

**20 A**

Min Current

**200 A**

Max Current

Rated Duty Cycle	60 %
------------------	------

## Physical Characteristics

Dimensions	370 x 150 x 300 mm
Weight	5.5 KG

## Features

Key Features	IGBT Technology, Digital Display, Portable Design, Stable Arc
--------------	---
