

# Digital Display Wall Mounted Water Heater

This water heater is compact and efficient, designed for household use. It features a digital display for temperature monitoring and a rotary knob for precise temperature control.

## Product Overview

### Compact Domestic Heating Solution

The JSQ20-10ST56 is a high-efficiency, wall-mounted water heater engineered for reliable domestic performance. It features an intuitive digital display for real-time temperature monitoring and a precise rotary control system. Designed with safety and space-saving efficiency in mind, this unit provides a consistent hot water supply for various household requirements.

## Technical Specifications

Model Number	JSQ20-10ST56
Mounting	Wall Mounted
Control Method	Rotary Knob
Interface	Digital LED Display

## Safety Features

### Safety Equipment

- Integrated bottom safety shield

## Application

Primary Applications	Domestic Hot Water, Household Use, Space-saving Installation
