

# Digital EPS Emergency Power Supply

This emergency power supply provides reliable backup power for critical loads during power outages. It features advanced digital control technology and ensures seamless transfer to battery power.

## Product Overview

### Intelligent Digital Emergency Power

The RNE series intelligent totally digital EPS is a professional-grade emergency power supply engineered to provide robust backup power for critical infrastructure. By utilizing advanced digital control technology, the system ensures an instantaneous and seamless transition to battery power during outages. This high-efficiency design maintains stable, clean power delivery, protecting sensitive equipment and ensuring uninterrupted operations.

#### Key Features

Intelligent Digital Control, Seamless Transfer, High Efficiency, Comprehensive Protection

## System Characteristics

#### Technology

Totally Digital

#### System Type

Digital EPS (Emergency Power Supply)
