

Digital Home Safe with Electronic Keypad

This digital home safe provides robust protection against theft. It features a user-friendly electronic keypad for easy access and is ideal for home or office use.

Overview

Secure and Reliable Digital Protection

This digital home safe is designed for high-security storage of documents and valuables, featuring a robust electronic keypad with guest and master code options. Its sturdy construction includes integrated fixing holes in the base and back for secure mounting in homes, offices, or hotel environments. With an automated battery test system and emergency manual override, this safe ensures consistent access and peace of mind.
