

Digital IGBT MIG/MMA Welding Machine

This digital IGBT MIG/MMA welding machine features microprocessor control. It is designed for MIG (Metal Inert Gas) and MMA (Manual Metal Arc) welding processes.

Product Overview

Professional Digital Welding Solution

This Digital IGBT MIG/MMA welding machine is engineered for versatility and precision in industrial environments. Featuring advanced microprocessor control and synergic 2T/4T operation, it simplifies complex welding tasks while ensuring consistent performance. Designed with portability in mind, the unit weighs only 18kg and includes robust self-protection systems for safety and reliability.

Technical Specifications

Power Input Compatibility	1HP, 3HP, 220V, 380V
Voltage Auto-Switching	Yes
Machine Weight	18 kg
Cooling Design	Double fan system for improved heat dissipation and higher duty cycle

Features & Control

Welding Modes

- MIG (Metal Inert Gas)
- MMA (Manual Metal Arc)
- Synergic 2T/4T Control

Operation Panel

Microprocessor-based digital interface

Safety & Protection

Safety Systems

Overvoltage Protection • Voltage Shortage Protection • Overheating Protection • Overcurrent Protection
