Product Overview

Precision Angle Measurement Solution

This digital laser angle finder is a versatile tool designed for professionals in construction and woodworking. It combines digital precision with traditional bubble levels, ensuring accurate horizontal and vertical alignment. Equipped with a high-visibility laser pointer, it provides extended range for complex tasks, while the integrated vacuum pump system ensures steady operation.

Technical Specifications

Laser Performance

635 nm Wavelength	1 mW Max Power	2 Laser Class
-----------------------------	--------------------------	-------------------------

Power Source	3.7V Lithium Battery
Working Current	740 mA
Laser Line Length	6-9m

Advanced Features

Current Distribution

Component	Max Current
Laser	<40mA
Vacuum Pump	<700mA

Vacuum Pump Flow	2 L/min
------------------	---------
