

Digital Laser Distance Measurer

This digital laser distance measurer is designed for accurate distance measurements. It features multiple measurement modes, a clear display, and durable construction for reliable performance in various environments.

Product Overview

High-Precision Laser Distance Measurement

This digital laser distance measurer is a versatile tool engineered for professional accuracy in construction, renovation, and real estate applications. It supports multiple measurement modes, including single distance, continuous measurement, area, and volume calculations. Designed for durability and ease of use, it features intuitive button controls and a clear display for reliable performance in both indoor and outdoor environments.

Key Features

Maximum Measurement Range

100 m
Range

Advanced Functions

- Min/Max tracking
- Addition/Subtraction calculation

Measurement Modes

Single Distance, Continuous Measurement, Area Calculation, Volume Calculation

Design & Build

Construction

Durable Housing • Professional Grade

Interface

Intuitive button controls with high-clarity display
