

Digital Laser Distance Measurer

This laser distance measurer provides accurate measurements of distance, area, and volume. It features a digital display and function buttons for easy operation.

Product Overview

Professional Laser Distance Measurement

This professional laser distance meter is designed to save valuable working time during interior construction, layout, and decoration projects. It offers high-precision measurement capabilities including distance, area, and volume calculations. Additionally, it supports advanced Pythagorean measurements for complex spatial analysis, making it an essential tool for professional contractors and designers.

Measurement Capabilities

Supported Modes

- Distance Measurement
- Area Measurement
- Volume Measurement
- Pythagorean Measurement
- Second Pythagorean Measurement
- Third Pythagorean Measurement

Key Features

Operation

FUNC Mode Selection • Clear Function • Power Off

Core Functionality

Interior Construction, Decoration Layout, Digital Display, Multi-Mode Operation
