

# Digital Loop TV Antenna for Enhanced Signal Reception

This digital loop TV antenna is designed for optimal signal reception. Its loop design enhances signal capture, providing clear and reliable television viewing.

## ADDITIONAL IMAGES

## Product Overview

### Enhanced Signal Reception

This digital loop TV antenna is engineered to provide reliable access to local VHF and UHF signals, ensuring clear Full HD broadcasting. Its unique hollow design offers a modern, space-conscious aesthetic that fits seamlessly into home entertainment setups. The unit includes a detachable amplifier and flexible powering options, making it a versatile solution for varying indoor signal environments.

## Performance Metrics

### Output Level

**105 dBuV**

Output Level

VHF Frequency Range	174 MHz
UHF Frequency Range	470-862 MHz
Noise Figure	3.5 dB

## Technical Specifications

VSWR (VHF)	3
VSWR (UHF)	2
Impedance	75 $\Omega$
Power Requirements	DC 5V/550mA

## Features

### Powering Methods

- USB Power
- AC/DC Adaptor

### Included Accessories

Detachable Amplifier, AC/DC Adaptor
