Overview

Precision Digital Zero Setter

This digital machine tool zero setter is designed to streamline tool setting processes while ensuring high precision. Featuring an IP65-rated design, it offers reliable performance even in environments with splash water. The device provides a resolution of 0.001mm and includes a clear digital display for accurate, obvious readings, significantly improving work efficiency compared to mechanical alternatives.

Features

Key Features

- Digital display for clear, accurate readings
- Lighting indicator at zero point
- Magnetic base for steady fixation
- Non-damaging to tool edge
- Selectable units (mm/inch)

Compatible Equipment

CNC Machines, Milling Machines, Lathes
