

Digital Motorcycle Speedometer and Odometer

Digital instrument displays speed and distance traveled. Designed for handlebar mounting, it features multiple buttons for navigation and control.

Product Overview

Digital Motorcycle Instrument Cluster

This digital automotive instrument is designed for precise monitoring of vehicle performance, specifically tailored for motorcycle applications. It features a clear digital display for real-time speed tracking in mph and cumulative distance monitoring via an integrated odometer. The unit is built with a durable black casing and includes tactile navigation buttons for ease of use during operation.
