

Digital Multifunction Meter with Voltage, Current, Frequency, and Temperature Display

This indicator displays real-time measurements of current, voltage, frequency, and temperature. Its digital display ensures clear and easy-to-read values for diverse monitoring applications.

Product Overview

Precision Monitoring Solution

The AD22-22 series digital multifunction meter provides reliable, real-time monitoring of critical electrical parameters including voltage, current, frequency, and temperature. Designed for panel mounting with a standard 22mm hole size, this compact indicator features a high-visibility LED display suitable for industrial and electronic applications. Built to withstand demanding environments, it offers robust protection and consistent performance with a continuous working life of over 30,000 hours.

Electrical Specifications

Current Measurement Range	100 A
Voltage Fluctuation Tolerance	± 20%
Power Frequency Withstand Voltage	2.5 KV
Insulation Resistance	e 2M Ω
Operating Frequency	50-60 Hz

Performance Metrics

Continuous Working Life

30000 Hours

Working Life

Display Brightness	e 100CD/M ²
--------------------	------------------------

Environmental & Durability

Head Protection Grade

IP65 • IP67 (Customizable)

Ambient Temperature Range

-25°C to 55°C

Relative Air Humidity

d 98%

Physical Characteristics

Hole Size

22 mm
