

Digital Parameter Measurement Instrument

This precision instrument is designed for measuring various parameters. It features a multi-segment LED display for clear data presentation and is equipped with multiple control buttons for parameter selection and adjustment.

Product Overview

Precision Digital Parameter Measurement

This digital parameter measurement instrument is engineered for high-accuracy monitoring in demanding industrial environments. It features a multi-segment LED display that ensures clear, real-time data visibility for critical operations. Designed with a robust, user-friendly interface, it allows for precise parameter selection and adjustment, making it an essential tool for professional industrial monitoring applications.

Technical Specifications

Interface

- Parameter selection buttons
- Adjustment controls
- ENTER button
- CLEAR button
- ESC button

Construction

Robust • Industrial Grade

Display Type

Multi-segment LED

Application

Primary Applications

Industrial Monitoring, Precision Measurement, Real-time Data Acquisition
