

# Digital Personal Scale with Anti-Slip Platform

This digital personal scale has a rubber finished platform with an anti-slip surface. It accurately measures weight up to 180kg and displays it on a clear LCD screen.

## Overview

Comprehensive overview of the scale's features including the rubberized surface, high-precision sensors, and BMI calculation capability.

### Professional Digital Personal Scale

This digital personal scale features a high-precision strain gauge sensor system for accurate weight measurement up to 180kg. The platform is finished with a rubberized anti-slip surface to ensure safety and comfort during use. With integrated BMI calculation and a large LCD display, it provides a comprehensive health monitoring solution for professional and home environments.

## Key Performance Metrics

### Performance Metrics

**180 kg**

Max Capacity

**100 g**

Graduation

**300 mm**

Platform Width

## Physical Specifications

Scale Dimensions	300 x 300 x 21 mm
Platform Finish	Rubber finished anti-slip surface

## Display & Interface

Display Type	LCD Display
LCD Dimensions	80 x 40 mm
System Indicators	Overload Indication, Low Battery Indication, Error (Err) Display

## Operational Features

### Smart Features

- Step-on technology for instant activation
- Auto-power-off for energy saving
- High precision strain gauge sensor
- BMI (Body Mass Index) calculation
- Low center of gravity to prevent rollover
- Fillet grinding for safety

## Power Requirements

### Power Source

3 x 1.5V AAA batteries

## Measurement Units

### Weight Units

kg • lb • st

## Health Monitoring

### BMI Classification

Category	BMI Range
Thin	< 18.5
Normal	18.5 - 24
Overweight	24 - 28
Fat	> 28
