

Digital Personal Scale with LED Display

This digital personal scale has a 6mm tempered glass platform for durability. It is equipped with a high-precision strain gauge sensor and an LED display.

Product Overview

Technical specifications and features overview of the digital personal scale.

Digital Personal Scale

This compact digital personal scale is designed for precision and ease of use in home environments. Featuring a durable tempered glass platform and a high-precision strain gauge sensor, it ensures accurate weight measurements up to 150kg. The device includes user-friendly features such as automatic step-on activation, an easy-to-read LED display, and clear indicators for overload and low battery status.

Measurement Specifications

Maximum Capacity

150 kg

Capacity

Graduation

100 g

Design & Build

Platform Material

6mm tempered safety glass

Scale Dimensions

230 x 140 x 18 mm

Display & Interface

Display Type

LED

Display Dimensions

29 x 65 mm

Power & Operation

Power Supply	3 x 1.5V AAA batteries
Operation Features	Step-on activation, Auto-off

Safety & Indicators

System Indicators

- Overload indication (oL- / Err)
- Low battery indication (Lo)
