

Digital Pulse MIG Welding Machine

This digital pulse MIG welding machine provides versatile welding solutions with precise control. It utilizes advanced pulse MIG technology to ensure high-quality welds with minimal spatter on various materials.

Overview

Advanced Digital Welding Solution

This Digital Pulse MIG Welding Machine is a versatile, high-performance tool designed for professional welding applications. Featuring advanced IGBT inverter soft-switch technology, it offers precise control for DC MMA, Pulse TIG, and double-Pulse MIG welding. Built for demanding environments, it includes a specialized trolley for portability, robust safety protections, and a user-friendly interface to ensure high-quality, low-spatter welds across various materials.

Technical Specifications

Supported Welding Modes

- DC MMA
- Pulse TIG
- Double-Pulse MIG

Inverter Technology	IGBT Inverter Soft Switch
Compatible Gases	CO2, Mix Gas, Argon
Wire Feeder	4-Roller System

Features & Controls

Control Interface	Digital Control with Two-Knob Adjustment
Trigger Function	2T/4T
Synergic Operation	Yes

Safety & Design

Safety Protections

Over Current Protection • Over Heat Protection

Mobility

Integrated Special Design Trolley

Compliance

Certifications

CE
