

Digital Satellite Receiver with CI+ Conditional Access

This digital satellite receiver is designed for receiving and decoding digital satellite signals. It provides standard definition output and supports CI+ conditional access for encrypted channels.

Product Overview

Professional Digital Satellite Receiver

This digital satellite receiver is engineered for reliable signal reception and decoding, featuring advanced CI+ conditional access support for encrypted content. Designed with a user-friendly front panel interface, it includes a clear four-digit LED display and intuitive navigation controls. Its robust architecture ensures stable performance for professional digital satellite broadcasting applications.

Technical Specifications

Conditional Access

CI+ • Encrypted Channel Support

Display Interface	Four-digit LED display
Signal Capability	Digital Satellite
Output Resolution	Standard Definition

Connectivity & Design

Connectivity
