

# Digital Satellite TV Receiver

This digital satellite receiver is DVB-S and MPEG-2 compliant. It features program storage, software updates via RS-232, and multi-language support.

## Product Overview

### Professional Digital Satellite Receiver

This digital satellite receiver offers high-performance broadcasting capabilities compatible with DVB-S and MPEG-2 standards. It features advanced display options, including 9-picture multi-view and extensive zoom functionality, ensuring a premium viewing experience. Designed for ease of use, it supports plug-and-play installation with automatic scanning and a large storage capacity for up to 3000 programs.

## Technical Specifications

### Tuner Performance

**45 MS/S**

Max Symbol Rate

**3000 programs**

Channel Storage

### Interfaces

RS-232 Serial • SCART (Optional)

### Standards & Compliance

DVB-S, MPEG-2, C/Ku Band, SCPC/MCPC, PAL/NTSC, DiSEqC 1.0/1.2

## Features & Functionality

### Display & UX

- 9-picture multi-display
- Zoom capabilities (x2, x4, x6, x8, x16)
- 800 pages teletext support
- 13-language interface
- Subtitle support

### Installation

- Plug & play self-installation
- Automatic program scanning
- Preset search
- OTA software updates
- LNB power short circuit protection
