

# Digital Satellite TV Receiver

This digital satellite receiver is fully compliant with DVB-S and MPEG-2. It features automatic program scanning, multiple language support, and zoom capabilities.

## Overview

### Professional Digital Satellite Receiver

This digital satellite receiver offers high-performance signal processing with full compatibility for DVB-S and MPEG-2 standards. It features advanced functionality including multi-picture display, high-capacity program storage, and automatic channel scanning for seamless deployment. Designed for flexibility, the unit supports both C and Ku band reception with LNB protection, making it a reliable solution for professional broadcasting requirements.

## Technical Specifications

### Demodulation & Tuner

**45 MS/S**

Max Symbol Rate

**3000 channels**

Program Storage

### Switching Protocols

- DiSEqC 1.0
- DiSEqC 1.2
- 13V/18V
- 22KHz
- 0/12V

### Signal Standards

DVB-S, MPEG-2, SCPC, MCPC, C-Band, Ku-Band

## User Experience

### User Interface & Display

- 9-picture display mode
- Zoom capabilities (x2 to x16)
- 800 pages teletext
- Subtitles support
- 13 language interface

### Installation & Maintenance

Plug & Play • Auto Scanning • LNB Short Circuit Protection • RS-232 Software Update • OTA Update

## Hardware

### Connectivity

Feature	Status/Detail
SCART Socket	Optional
Video Output	PAL/NTSC Convertible
Serial Port	RS-232
