

Digital Terrestrial TV Receiver

This digital TV receiver is designed for terrestrial broadcasts. It supports USB connectivity for media playback and recording.

Overview

Digital Terrestrial Receiver

The DVT-4601 is a compact digital terrestrial receiver designed to deliver high-quality standard definition broadcast reception. This free-to-air (FTA) model features MPEG-2 decoding and a user-friendly interface, making it a reliable solution for accessing digital channels. With its versatile connectivity options, including SCART output and an optional USB interface, it offers flexibility for media playback and recording needs.
