

Digital Time Delay Relay with Mechanical Counter

This time delay relay is designed for industrial automation, offering multiple time ranges and operating modes. The relay provides control for electrical circuits and equipment, and is housed in a durable enclosure for panel mounting.

Overview

Versatile Industrial Timing Solution

The DH48S-S is a high-performance time delay relay engineered for precise control in industrial automation environments. Featuring a clear digital display and an integrated mechanical counter, it allows for accurate time setting and real-time monitoring of operations. Its compact, durable design makes it an ideal choice for panel mounting, offering reliability and flexibility for a wide variety of electrical circuit control applications.

Technical Specifications

Model Number	DH48S-S
Display Type	Digital
Mounting Style	Panel Mount

Features

Key Features	Digital Display, Mechanical Counter, Compact Design, Industrial Grade, Multiple Time Ranges
--------------	---
