

Digital Timer and Counter Module

This digital timer and counter module is designed for accurate timekeeping and counting functions. It can be integrated into a variety of electronic systems for precise control.

Product Overview

Digital Timer and Counter Module

This advanced digital timer and counter module is engineered for high-precision temporal and numerical tracking in complex system environments. It supports versatile applications ranging from interactive multimedia services to broadcast management and advertising distribution systems. Designed with standard interfaces and high scalability, this module ensures reliable performance across diverse digital signage and consumer device platforms.

Technical Capabilities

Supported Media Formats

- Display Ads
- Search Ads
- Video Interactions
- Broadcast Channel Content
- VOD (Video on Demand)
- Interactive Services
- Banner Ads
- Text/SMS Ads
- MMS (Multimedia Messaging)

Key System Features

Heterogeneous Deployment, Universal Metadata, Standard Interfaces, Platform Independent, Scalable Architecture, Device Independent

Deployment Compatibility

Compatible Platforms

IPTV/Web • HFC Cable TV • Mobile Networks

Hardware Support

Device Category
Personal Computers
Set-Top Boxes
Mobile Devices
Game Consoles
Digital Signage/Displays
