

# Digital Timer and Counter with LED Display

This digital timer and counter features a multi-digit display. It is suitable for precise timing and counting in industrial and scientific applications.

## Product Overview

### High-Precision Digital Monitoring

This advanced digital timer and counter provides highly accurate performance for industrial and scientific environments. Featuring a high-visibility seven-segment LED display, it offers intuitive monitoring of timing and counting operations. The versatile unit is engineered for reliable operation in demanding applications where precision is paramount.

## Technical Specifications

### Core Functionality

#### 2 Timer/Counter

Operating Modes

Display Technology	Seven-segment LED
Available LED Colors	Red, Yellow, Cyan

## Applications

### Primary Applications

- Industrial automation
- Scientific research
- Process timing
- Production counting

## Compliance & Quality

### Application Suitability

Industrial Grade • Scientific Precision
