

Digital Timer and Counter with Panel Mount

This digital timer and counter features a display screen and multiple control buttons for programming. It is designed for electrical panel mounting and is suitable for automated control systems.

Product Overview

Versatile Digital Control

This digital timer and counter is engineered for precise automated control in electrical systems. Designed for standard panel mounting, it offers intuitive programming through a front-facing display and control interface. The unit supports both automatic and manual operation modes, providing flexible solutions for industrial timing and counting applications.

Technical Specifications

Interface Components

- Digital Display Screen
- Programmable Control Buttons
- Auto/Manual Selector Switch
- Labeled Terminal Blocks

Status Indicators

I • O • RUN • P

Mounting Type

Panel Mount

Operational Modes

Auto, Manual
