

Digital Tire Pressure Monitoring System (TPMS)

This digital TPMS display provides real-time tire pressure and temperature readings for each tire. It features color-coded indicators that provide visual alerts for pressure status.

Product Overview

Advanced Real-Time Tire Monitoring

This Digital Tire Pressure Monitoring System (TPMS) provides comprehensive, real-time insights into your vehicle's tire health. By continuously tracking both pressure and temperature for each individual tire, the system ensures optimal safety and performance on the road. The intuitive display utilizes color-coded alerts to instantly notify operators of pressure status, allowing for proactive maintenance and reduced risk of tire-related failures.

Technical Specifications

Pressure Unit	KPa
Temperature Unit	Celsius

Monitoring Capabilities

Key Metrics

258 KPa

Typical Pressure Reading

Alert Indicators

Yellow (Warning) • Green (Optimal) • Red (Critical)
