

Digital TV Antenna for Attic and Outdoor Use

This antenna is designed to receive digital TV signals. Its light, compact, and durable construction is suitable for both attic and outdoor installation.

Product Overview

High-Performance Digital TV Reception

This digital TV antenna is engineered for reliable signal reception in both attic and outdoor environments. Its compact, lightweight design ensures straightforward handling and installation, while the robust, weather-resistant construction provides long-term durability against the elements. Designed to deliver clear Full HD and local UHF signals, it features a large reflector panel to minimize interference and ensure stable broadcast quality.

Key Features

Installation Highlights

Compact Design, Lightweight, Easy Installation, Weather Resistant, Anti-Rust, Water-proof

Technical Specifications

UHF Beam Width

17 °

Beam Width

Signal Performance Data

Metric	Value
Polarization	Horizontal
F/B Ratio	25dB
UHF Frequency Range	470 MHz
Impedance	75 ©
UHF VSWR	2 Ratio

Connectivity

Connection Interface

F-Type Connector
