

# Digital TV Set-Top Box with DVB-T2 Support

This digital TV set-top box receives and decodes digital video broadcasting signals. It supports both standard definition and high definition outputs, allowing users to watch digital television channels.

## Overview

### High-Definition Android Media Hub

This versatile digital TV set-top box combines robust DVB-T2 signal decoding with the flexibility of an Android-powered media interface. Designed for professional entertainment setups, it supports high-definition output up to 1080p and seamless web connectivity for streaming and social media. With expandable storage and extensive peripheral compatibility, it serves as a central hub for digital multimedia consumption.

## Technical Specs

Operating System	Android 2.2
Resolution Support	480P, 576P, 720P, 1080P
Graphics Engine	HD OpenGL 2.0 with 2D/3D acceleration

## Connectivity

### Physical Interfaces

- HDMI Output
- USB 2.0 ports (2 standard, up to 4 optional)
- SD/TF Card Reader
- AV Output
- Coaxial & Optical Fiber Output
- Ethernet RJ45
- DC 5.0V Input

Wireless Capability	Built-in WiFi 802.11b/g/n
---------------------	---------------------------

## Compliance

### Global Certifications

CE • FCC • UL • CSA

## Power

### Voltage Range

<b>99 V</b> Min Voltage	<b>264 V</b> Max Voltage
