

Digital TV Set-Top Box with USB Media Playback

This digital TV set-top box receives and decodes digital video broadcasting (DVB) signals. It supports media playback and recording through a USB port and features standard playback control buttons.

Overview

Professional Grade Digital TV Reception

This Digital TV Set-Top Box provides a robust solution for receiving and decoding high-definition satellite signals. It features extensive connectivity, including HDMI 1.3 and USB 2.0, supporting both PVR recording and multi-format media playback. Designed with efficiency and usability in mind, it offers an intuitive OSD menu and 15-day EPG support for a seamless viewing experience.
