

Digital Ultrasonic Cleaner with Basket

This ultrasonic cleaner features a stainless steel tank and a digital control panel. It uses high-frequency sound waves to remove contaminants from immersed objects.

Product Overview

Professional Ultrasonic Cleaning

This digital ultrasonic cleaner utilizes high-frequency sound waves to efficiently remove contaminants from delicate items. Built with a durable stainless steel tank, it provides a reliable solution for cleaning jewelry, eyeglasses, and small precision parts. The integrated digital control panel allows users to precisely set cleaning times for consistent, professional results.
