Product Overview

Precision Digital Measurement Tool

This electronic digital vernier caliper is designed for high-precision measurements in engineering, machining, and quality control environments. Featuring a clear LCD display, it allows for seamless switching between millimeter and inch units. The durable stainless steel construction ensures reliability, while the zero-setting and ABS/INC measurement modes facilitate efficient workflow.

Measurement Capabilities

Measuring Range

150 mm
Range (mm)

6 in
Range (inches)

Accuracy & Resolution

Metric	Resolution	Accuracy
Millimeters	0.01mm	±0.02mm
Inches	0.0005in	±0.001in

Technical Features

Included Accessories

- Desiccant silica gel pack for moisture protection

Material	Stainless Steel
Display Features	LCD Display, Zero Setting, ABS/INC Modes, mm/inch Conversion
