

Digital Vernier Caliper

This digital vernier caliper accurately measures mechanical parts. It features a clear digital display and durable construction.

Product Overview

Precision Digital Measurement

This Digital Vernier Caliper is designed for high-precision measurement tasks in engineering, machining, and quality control environments. Featuring a large, clear LCD display and stainless steel construction with hardened jaws, it ensures both durability and readability. The tool supports seamless switching between metric and imperial units, with zero-setting capabilities at any position for convenient incremental measurements.

Technical Specifications

Resolution	0.01mm / 0.0005"
Key Features	3-Button Interface, Big LCD Display, Automatic Power Off, Stainless Steel Construction, Hardened Jaws

Model Variants

Available Ranges

Range (mm/inch)	Article Number
100mm / 4"	DC01-1011
150mm / 6"	DC01-1021
200mm / 8"	DC01-1031
300mm / 12"	DC01-1041
