Smart Underfloor Heating Control

This digital WiFi thermostat is engineered for precise temperature management in both electric and hydronic underfloor heating systems. It offers advanced connectivity, allowing for remote operation via smartphone apps and voice control integration with major smart home assistants. Designed for efficiency, it includes programmable scheduling, open window detection, and energy-saving modes to optimize home comfort and reduce heating costs.

Technical Specifications

Electrical Ratings

230 V/AC

Operating Voltage

16 A

Maximum Current (Electric)

3 A

Maximum Current (Water)

Quality Certifications

CE, ROHS, TÜV SÜD

Smart Features

Connectivity & Integration

WiFi Enabled • Amazon Alexa Compatible • Google Assistant Compatible • Smartphone App Control

Features

Key Functional Features

- Programmable weekly scheduling
- Open window detection
- Eco mode for energy savings
- Overheat protection
- Child lock security
- Manual and automatic operation modes
