

# Dimensional Pipe Diagram

This image provides a cross-sectional view of a pipe, clearly labeling its outer diameter as 'D' and inner diameter as 'd'. The diagram is suitable for technical documentation, accurately representing the pipe's dimensions and wall thickness.

## Product Overview

### Dimensional Pipe Diagram

This dimensional pipe diagram provides a precise, cross-sectional view essential for engineering and technical procurement. It clearly illustrates the relationship between outer diameter (D) and inner diameter (d), offering a visual reference for wall thickness and structural geometry. Designed for clarity, this diagram is an indispensable tool for verifying specifications in piping and tubing applications.

## Technical Specifications

### Key Dimensional Parameters

- Outer Diameter (D)
- Inner Diameter (d)
- Wall Thickness

<b>Geometry Type</b>	Circular Cross-Section
<b>Application Suitability</b>	Engineering Drawings, Technical Documentation, Piping Systems, Tubing Specifications
