

DIN 1480 Turnbuckle with Plane Ends

This DIN 1480 turnbuckle is designed with plane ends for easy connection. It is constructed from durable metal, providing reliable tension adjustment in rigging systems.

Product Overview

DIN 1480 Turnbuckle with Plane Ends

The DIN 1480 turnbuckle is a professional-grade component designed for precise tension and length adjustment in demanding rigging and structural systems. Featuring reliable plane ends, this unit ensures a secure and stable connection to mating hardware for various industrial and construction applications. Its robust metal construction provides long-lasting performance and consistent reliability in the field.

Technical Details

Standard	DIN 1480
End Type	Plane Ends
Material	Metal, Industrial Grade

Applications

Common Applications

- Rigging systems
- Tension adjustment
- Length regulation
- Construction fastening
