

# DIN 3352-F5 Non-Rising Stem Solid Wedge Gate Valve DN 40-500

This gate valve features a solid wedge disc for tight shut-off. Its non-rising stem design saves vertical space and is suitable for various media and operating conditions.

## Product Overview

### Industrial Gate Valve Solution

The DIN 3352-F5 Non-Rising Stem Solid Wedge Gate Valve is a robust and reliable component designed for demanding industrial applications. It features a solid wedge disc for tight shut-off and a non-rising stem design to save critical vertical installation space. Compliant with DIN 3352-F5 standards, this valve ensures interchangeability and consistent performance, making it an ideal choice for operations requiring long service life and minimal maintenance.

## Technical Specifications

### Size Range (DN)

- 40
- 500

Standard	DIN 3352-F5
Valve Type	Non-Rising Stem Solid Wedge Gate Valve

## Key Features

### Key Benefits

Non-Rising Stem • Solid Wedge Disc • Tight Shut-off • Space Saving • Low Maintenance
