

DIN 338 High-Speed Steel Drill Bit

This high-speed steel (HSS) drill bit is manufactured to DIN 338 standards. It features a helical flute design for efficient chip removal and reduced friction.

Product Overview

DIN 338 High-Speed Steel Drill Bits

These high-speed steel (HSS) drill bits are manufactured to strict DIN 338 standards, ensuring consistent quality and performance. Featuring a precision-ground helical flute design, they facilitate efficient chip removal and reduced friction during operation. They are versatile tools suitable for drilling into steel, cast iron, non-ferrous metals, and various plastics, providing accurate hole sizing and smooth surface finishes.

Standards & Material

Standard

DIN 338

Material

High-Speed Steel (HSS)

Dimensional Data

Available Sizes

Diameter (mm)	Flute Length (mm)	Overall Length (mm)
0.2	2.5	19
0.5	6	22
1	12	34
1.5	18	40
2	24	49
2.5	30	57
2.85	33	61

Applications

Compatible Materials

Steel, Cast Iron, Non-ferrous Metals, Plastics
