

DIN 603 Truss Head Square Neck Carriage Bolt

This is a DIN 603 carriage bolt with a truss head and square neck. The galvanized finish provides corrosion resistance for use in woodworking and construction.

Product Overview

DIN 603 Carriage Bolt

The DIN 603 Truss Head Square Neck Carriage Bolt is designed for secure fastening in woodworking and construction applications. Featuring a domed head and a square neck section beneath it, this bolt effectively grips into the material to prevent rotation during nut tightening. Its galvanized finish provides essential corrosion resistance, making it a reliable choice for various structural projects.
