

DIN 6914 High Strength Hex Bolt

High-strength hex bolts conform to DIN 6914 standards for structural bolting. These bolts offer superior tensile strength and durability for secure connections in steel structures and machinery.

Product Overview

High-Strength Structural Fastening

The DIN 6914 High Strength Hex Bolt is engineered for demanding structural applications, providing superior tensile strength and reliability. These bolts are essential for heavy-duty connections in building construction, automotive assembly, and industrial machinery. Designed to meet international standards, they ensure secure and durable fastening performance in critical environments.

Technical Specifications

Available Grades

8.8 • 10.9 • 12.9 • Gr5 • Gr8

Surface Finishes

- Plain
- Black Oxidized
- Zinc Plated (White, Yellow, Blue, Color)
- Hot Dip Galvanized
- Dacromet

Material

Carbon Steel, Alloy Steel

Standards & Compliance

Supported International Standards

- DIN
- ISO
- ANSI
- ASME
- BS
- AS
- JIS

Logistics & Supply

Monthly Supply Ability

800 tons

Monthly Capacity

Standard Packaging	25kg per carton, 36 cartons per pallet
--------------------	----------------------------------------

Delivery Lead Time	7-30 days
--------------------	-----------

Applications

Primary Applications	Building, Instrument, Automobile, Furniture
----------------------	---------------------------------------------
