

DIN 875 Precision Square

This precision square is manufactured to DIN 875 standards. It features hardened steel construction and precision-ground surfaces for accurate 90-degree angles.

Product Overview

Precision Engineering Standard

The DIN 875 Precision Square is a high-quality measurement tool designed for toolmakers, machinists, and quality control professionals. Manufactured to rigorous DIN 875 standards, it features hardened steel construction and precision-ground surfaces to ensure perfect 90-degree angles. This tool is essential for verifying perpendicularity and ensuring accuracy in demanding manufacturing and inspection environments.

Technical Specifications

Size Availability

- Various sizes available

Manufacturing Standard	DIN 875
Material	Hardened Steel
Surface Finish	Precision-ground

Applications

Ideal For

Toolmaking, Machining, Quality Control, Inspection
