

DIN 933 Hexagon Head Bolt

This hexagon head bolt is manufactured to DIN 933 standards with a full thread. It is suitable for industrial and construction applications requiring secure connections.

Product Overview

DIN 933 Hexagon Head Bolt

This hexagon head bolt is manufactured strictly according to DIN 933 standards, ensuring reliability and consistency for industrial and construction applications. Featuring a fully threaded shank, it provides maximum grip and fastening strength across its entire length. The hexagonal head design allows for easy installation and removal with standard wrenching tools.

Technical Specifications

Standard	DIN 933
Thread Size Range	M6 to M36
Length Range	10mm to 200mm

Material & Finish

Material
Steel

Surface Finish
Zinc Plated

Design Features

Head Type	Hexagon
Thread Configuration	Full Thread
