

DIN Rail Mount Electromechanical Timer

Electromechanical timer featuring a transparent housing designed for DIN rail mounting. Includes a timing dial, relay output, and screw terminals for industrial and automation applications requiring precise time control.

Product Overview

Industrial Precision Timing

This electromechanical timer is engineered for high-performance industrial and automation applications. Featuring a robust transparent housing and standard DIN rail mounting, it offers seamless integration into control cabinets. Designed for reliability and ease of use, it utilizes a clear timing dial and secure screw terminals for precise, straightforward time management in critical processes.

Technical Specifications

Mounting Style	DIN Rail
Wiring Connection	Screw Terminals
Key Features	Transparent Housing, Manual Timing Dial, Relay Output

Application

Suitable Environments

- Industrial Automation
- Control Cabinets
- Process Timing
