

DIN Rail Mountable Electrical Parameter Meter

Electrical parameter meter is designed for use in industrial and electrical applications. The device features a display screen and multiple connection points, and it is intended for DIN rail mounting within electrical panels or systems.

Overview

Professional Electrical Monitoring

This DIN rail mountable electrical parameter meter is designed for precise monitoring and control within industrial electrical panels. Its compact form factor allows for efficient space utilization in standard 35mm rail systems. Built for reliability, this device provides essential electrical parameter tracking to ensure system stability and safety.

Technical Specifications

Mounting Style	35mm DIN Rail
Device Category	Electrical Parameter Meter / Timer
Country of Origin	China
Design Features	Compact Design, DIN Rail Compatible, Integrated Display
