

DIN Rail Mountable Industrial Timer

Compact timer designed for DIN rail mounting in industrial control applications. It features adjustable time ranges and multiple operating modes for precise timing control.

Product Overview

Industrial Precision Timing

This DIN rail mountable timer is engineered for demanding industrial control applications. It provides high-precision timing capabilities essential for complex automation systems. With adjustable time ranges and versatile operating modes, this unit ensures reliable performance in diverse operational environments.

Technical Specifications

Model Series	CT1A
Timing Range	0.1s, 10s

Mechanical Characteristics

Design Compact • Industrial Grade	
Mounting Style	DIN Rail
