

DIN Rail Mountable Modular Socket

This modular socket is an auxiliary electrical component for modular terminal combinations installed in homes. It is suitable for DIN rail installation and can be used in conjunction with other analog terminal appliances.

Overview

Modular Socket Solution

The CQP20 series modular socket is a versatile auxiliary electrical component designed for installation within modular terminal combinations. Engineered for DIN rail mounting, this compact socket integrates seamlessly with other analog terminal appliances in industrial and commercial settings. It is constructed from high-quality, self-extinguishing, heat-resistant, and creepage-proof materials to ensure safety and durability.

Electrical Ratings

Rated Voltage	250 V
Rated Current	16 A

Standards & Compliance

Certifications

CE Certified

Supported Standards

Germany Standard, French Standard

Design Features

Key Features

- Self-extinguishing material
- Heat-resistant construction
- Creepage-proof design
- Easy DIN-Rail extraction
- Compact structure

Product Variants

Available Configurations

Model Name	Standard Type
CQP20	Standard
CQP20-F	French
CQP20-GP	German/Schuko
