

DIN Rail Switching Power Supply

These compact DIN rail power supplies provide reliable power for industrial applications. They feature a wide input voltage range and overload, short circuit, and overvoltage protection.

Product Overview

Industrial DIN Rail Power Solutions

These DIN rail switching power supplies are engineered for high efficiency and reliability in industrial automation and control environments. Featuring a compact, lightweight design, they support easy installation on standard TS-35/7.5 or TS-35/15 rails. With comprehensive protection mechanisms including short circuit, overload, over-voltage, and over-temperature safeguards, these units ensure stable operation for critical equipment.

Technical Specifications

AC Input Voltage	100-240VAC (Selectable by switch)
Cooling	Free air convection
Mounting	DIN Rail TS-35/7.5 or TS-35/15
Protection Features	Short Circuit, Overload, Over Voltage, Over Temperature
Warranty	2 Years

Performance Metrics

Quality Testing

100% Full Load Burn-in Test • LED Power Indicator

Key Performance Metrics

100 %
Full Load Burn-in

Product Variants

Model Specifications

Model	Output Voltage	Output Current
NDR-75-24	24V	3.2A
DR-75-24	24V	3.2A
DR-120-24	24V	5A
NDR-240-24	24V	10A
DR-240-24	24V	10A
LP-500-24	24V	21A
